Multi-shot ECD

With the **TASER X3** users can deploy a second and third cartridge immediately, incapacitating up to three subjects with a single unit. The X3 multi-shot ECD can engage multiple targets, displays warning arcs while loaded and delivers a calibrated neuro muscular incapacitation (NMI) pulse. The X3 contains a host of advanced sensors and data systems. Its Pulse Calibration System measures every electrical pulse and the Smart Cartridge Dock reads the type of cartridges loaded and whether they've been discharged. The rich data set from the X3 is uploaded securely to EVIDENCE.COM, allowing agencies to easily monitor the usage and system status of their entire arsenal of TASER X3 ECDs.

Alcohol & drug testing

Distributed by **C.J. Cooper & Associates, Inc.**, the DrugCheck NxScan Onsite is a multi-drug testing device that delivers instant, accurate results for up to 14 drugs of abuse, alcohol or adulterants. The self-contained urinalysis screening device detects the presence of alcohol at three thresholds: 0.04, 0.08 and 0.20. Collect urine in the cup, remove the privacy label and read the color pad on the alcohol strip at 2 minutes. The flat-panel design allows copying or scanning for a permanent record. The FDA-cleared NxScan Onsite is a tamper-proof, sanitary device with an integrated temperature strip.

Multi-purpose monocular

The **ATN NVM-14-3P** multi-purpose night vision monocular featuring advanced Generation 3 technology using ITT Pinnacle Image Intensifier Tube for a clear, crisp image in dark conditions. The NVM-14-3P is compatible with most IR laser aiming/illuminating devices, and can be used with a camera for night-time photography. Equipped with ATN's Total Darkness Technology, the ATN NVM-14-3P also has a built-in Infrared light-emitting source that allows for maximum flexibility, even when the available ambient light is minimal.

NIJ-06 certified body armor

This **First Choice Armor's** body armor meets or exceeds the National Institute of Justice's (NIJ) Voluntary Body Armor Compliance Testing Program NIJ Standard-0101.06 (NIJ-06). First Choice Armor's vest model TBL-II S6X Threat Level II is an extension to its existing Thin Blue Line series available in both custom-measured and off-the-rack sizes. The TBL-II S6X model has been recognized by NIJ for conforming to the rigorous requirements of the NIJ-06 standards. First Choice Armor's NIJ-06 body armor model TBL-II S6X Threat Level II uses the Aramid fiber Twaron, allowing superior comfort and lightweight protection that conforms and contours to all body types.

Impala-designed trunk organization

The **Tufloc** TufBox, made for the Chevy Impala, is a locking drawer system that provides a way to secure guns, store equipment and organize belongings to keep them safe and out of the way. Additionally, the TufBox allows the spare tire to remain in the trunk. Built with the same high quality as Tufloc SUV and Crown Victoria drawers, the Impala TufBox is manufactured out of heavy-gauge steel and has a powder-coated finish. The drawer can be ordered with a key lock or combination lock.
