NIGHT VISION MONOCULAR

American Technologies Network Corp.'s Night Spirit-2 is a rugged, lightweight, night vision monocular that uses multi-coated optics specially coated to gather light to provide clear, bright images coupled with quality image Gen. 2 intensifier tubes. A built-in illuminator allows you to see clearly, even in total darkness. The multi-coated all-glass optics is specially coated to absorb light. The Night Spirit-2 runs on a 1.5 volt AA size battery for up to 60 hours without IR and is water and fog resistant.

TOUGH MOUNT

RAM Mounting Systems introduced a new modular molded equipment console system, the RAM Tough-Box. The system's unique modular molded console design allows for correct ergonomics, safety and ease of installation. Unique molded faceplates incorporate tongue-and-groove features to prevent contamination of electronics and the loss of important documents, licenses and paperwork. The system's modular design allows for multiple configurations for the installer. This and the RAM Twist-Lock feature allow for quick and easy access to radios or switches for simple installation, upgrades and repairs.

BUFFER YOUR GUN BLAST

Buffer Technologies recently introduced the hydraulic AR-10 buffer from Enidine Inc. The new hydraulic AR-10 buffer reduces felt recoil and helps shooters maintain accuracy by suppressing bolt bounce and muzzle flip. It also helps protect optics by reducing shock to the delicate instruments. This Enidine buffer is the full stock AR-10 buffer and replaces the standard buffer assembly in the AR-10. The buffer is made from anodized steel with a corrosion-protection finish.

AN ELITE VEST

The Elite Vest from Woolrich features two hand-warmer pockets to hold frequently accessed items, as well as vertical Napoleon pockets to accommodate glasses, a wallet, a spare magazine or a small frame revolver or auto. Four hook-and-loop flap pockets can be used to carry a variety of gear, including spare magazines. Two deep zippered security pockets, two smaller zippered patch

pockets and two open pockets (one with two pen slots) round out the front of this vest. Four more pockets are inside the vest: two easily accessed, large front pockets; and two open pockets at the lower back to accommodate a radio or like item with elastic loops near the shoulders to keep wires in place.
