## GUN SPOTS

### TACTICAL CLOTHING

Woolrich's Elite Series Tactical line of clothing continues to expand, including lightweight apparel for the warmer months of summer and early fall. Among the recent offerings are short- and long-sleeved shirts, the latter being convertible to short-

sleeved. These shirts are 100 percent cotton poplin, feature UPF 30-plus skin protection and are treated with Dupont Teflon Fabric Protector to repel water and oil spills. Shown are Khaki and Sage, with Navy and Black also available. Similar in characteristics are the Zip-Up Instructor Shirts that feature four false buttons on the front, covering an easy-to-access zipper. Woolrich describes these as "ideal for both the range and the office."

Also shown is Woolrich's Elite Vest that features a 100 percent cotton canvas outer shell and 100 percent cotton poplin inner shell. It also offers UPF 30-plus skin protection and has been treated with DuPont Teflon Fabric Protector. It is shown in Khaki and is also available in Black, Navy, OD Green and Sage. For information on sizes, prices, etc., call (800) 996-2299 or visit [www.woolrich.com](http://www.woolrich.com).

### NIGHT VISION DEVICE

American Technologies Network Corp. (ATN) has developed a night vision the device that is compatible with riflescopes, spotting scopes or even hand-held. The PS22-3A is quickly and securely mounted directly in front of a daytime scope without tools. No further zeroing of the daytime scope is needed and all features of the latter remain operational. The PS22-3A uses hand-picked image intensifier tubes to provide the highest quality and performance. They have a guaranteed resolution of 64/72lp/mm and a minimum signal to noise ratio of 20. This device uses a catadioptric front lens system that combines specifically shaped mirrors and lenses to allow for very fast focal ratios and a smaller, more lightweight lens. The whole unit weighs only 650 grams. For more information, call (800) 910-2862 or visit [www.atncorp.com](http://www.atncorp.com).
