Michael this letter is to follow up on our previous conversations regarding your new Day-Night Vision Systems. We recently started using your ATN PS-22 system with a Leopold Mark 4 in a 3.5x10x40 scope. I want to tell you that this is the “Cats Meow”. The best system we have used to date. We currently have several other systems from ATN including night vision goggles and ATN night vision scopes. The PS-22 system is so far the best. For the last several weeks we have removed up to 8 targets without a single miss. The furthest target removed at night was approximately 200 yards. Under good moonlight conditions, 300 + yard targets will be very attainable. Keep up the good work at ATN.
