

Product Patrol

TurnKey UTV CUSTOMIZABLE OFF-ROAD VEHICLE

TurnKey UTV's newest product is a customizable off-road vehicle designed for law enforcement agencies. Typical vehicle applications include parking enforcement, tactical operations, riot control, search and rescue missions, and special event patrol. Vehicles feature a 50 mph top speed, 700 cc liquid cooled fuel injected motor, 2,000-pound towing capacity, 1,500-pound payload capacity, full independent suspension, four-wheel disk brakes, and 12-inch ground clearance. Custom options to fit specific needs and applications include Kevlar wraps, ballistic windshields, steel doors, and K-9 enclosures, as well as police light and siren packages.

Safariland EDW TASER HOLSTER

Safariland's comprehensive line of Automatic Locking System (ALS) duty holsters for Electrical Discharge Weapons (EDWs) provides law enforcement officers secure weapon protection with quick and easy access. Offered in seven model configurations with different belt mounting options, each of the new EDW duty holsters features Safariland's ALS design for secure weapon retention without straps or snaps to manipulate. Designed specifically to fit the TASER X26, the new EDW holsters offer a closed bottom with drain hole to protect the cartridge and automatically reactivate the safety on the TASER X26 when reholstering. Many of the new models are also ambidextrous for added flexibility.

American Technologies Network NIGHT VISION MONOCULAR

The 6015-WPT Night Vision Monocular from American Technologies Network Corp. (ATN) has received an overall score of 4.9 out of a possible 5 from the National Tactical Officer's Association (NTOA) in its Member Tested and Recommended Program ratings. The ATN 6015-WPT monocular is based on ATN's successful PVS-14 system used by the U.S. Military. The ATN 6015-WPT can be handheld, head/helmet-mounted for hands-free usage, and can be adapted to be used with cameras or camcorders. It also features ATN's innovative white phosphor technology, in which the viewer sees a crisp black and white image instead of the traditional green glowing image. This new technology allows for a clearer image with more detail and greater depth perception.
