## NEW PRODUCTS

### MTM CASE-GARD SHOOTING RANGE BOX

MTM's Case-Gard Shooting Range Box is both a tool box and cleaning station. The tool section features divided space for jags, brushes, solvents, etc. with plenty of deep storage space for supplies and ammo. A pair of adjustable gun forks featuring soft, over-molded rubber padding offers

easy positioning of firearms with a firm, non-marring hold.

For further information contact: MTM Molded products, Dept. SGN, 3370 Obco Ct., Dayton, OH 45414 or [www.mtmcase-gard.com](http://www.mtmcase-gard.com)

### ATN PS22-3 NIGHT VISION FRONT SIGHT

Recognizing that law enforcement and military personnel serve 24/7, American Technologies Network, Corp. (ATN) has developed a state-of-the-art day/night solution that is compatible with riflescopes, spotting scopes, or even as a hand-held unit. The PS22-3A night vision front sight mounts directly in front of your daytime scope quickly and securely without tools; making it night vision operational.

For further information contact: American Technologies Network, Dept. SGN, 1341 San Mateo Ave, South San Francisco, CA 94080 or [www.atncorp.com](http://www.atncorp.com).

### PELICAN AALG LIGHT

The Advanced Area Lighting Group (AALG) is a new area lighting system being designed and built by Pelican which harnesses the power, reliability and energy-efficiency of LED technology to provide a battery-powered portable area lighting system that provides 15 hours of continuous light and approximately 50,000 hours LED lifespan for such end users as nighttime road construction crews, railway engineers and first responders. The systems offer users the ability to illuminate a large work area without the fuel consumption, noise and air pollution associated with today's industrial diesel generator-powered lighting towers that use energy-zapping outdated light bulb technology.

For further information contact: Pelican Products, Dept. SGN, 23215 Early Avenue,

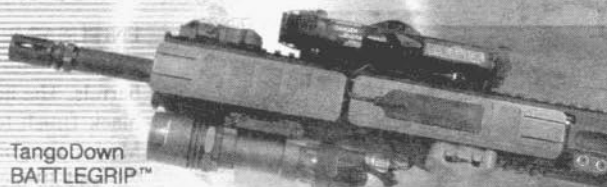

Torrance, CA 90505 or [www.pelican.com](http://www.pelican.com)

### LASERLYTE VERSION TWO LASER

LaserLyte introduces the Sub-compact Laser Sight Version Two (V2), the smallest and most versatile railed laser which features a small, removable Picatinny rail on the bottom of the laser. Weighing less than an ounce and shorter than an inch, it can mount directly on all 3-inch barrel sub-compact railed pistols and other railed weapons. Constructed of T6 aluminum, it features an integrated cross lock e clamp system and a quick detachable
